Assemble Carrier Brackets:

1. Mount carrier brackets to vehicle following Fig. 2. 
2. Tighten carrier brackets to vehicle. If necessary, adjust spacers sold separately for proper fit. 
3. Insert 2” crossbar through carrier brackets and into base tube. 
4. Insert female crossbar end through female crossbar end, and tighten carrier bracket to base tube. 
5. Assemble Carrier Brackets:
   - Note: Depending on bumper, it may be necessary to add spacers (sold separately) for proper fit. 
   - Insert 1-1/4” crossbar through carrier brackets and into base tube. 
   - Insert female crossbar end through female crossbar end, and tighten carrier bracket to base tube.
